

GA NCORP Quarterly News

ISSUE NO. 1 | AUGUST 2020 | VOLUME 1

Welcome to Year 7!!! As of 8/3, we have officially received our Notice of Award and have been funded to continue supporting our efforts. As we close out our 6th year of the GA NCORP grant, we would like to highlight some of the major accomplishments. Kudos to the team for a remarkable first half of the year! Due to the hard work and consistent efforts put forth, the second half of the year, although challenging, allowed GA NCORP to finish strong.

Congratulations!!!

STUDY OF THE MONTH

SWOG S1501 – Carvedilol for Cardiotoxicity in Breast Cancer
 (<https://clinicaltrials.gov/ct2/show/NCT03418961>)

- Metastatic HER2+ breast cancer with planned trastuzumab-based 1st or 2nd line therapy
- Increased risk for cardiotoxicity (prior anthracycline or heart disease risk factor)

QUICK TIP

Try calling potential patients the day before their visit to discuss eligible study(s). This will help them prepare for their visit, by easing the stress on both the patient and physician during their discussion.
